

BHARTI SHAMLAL AMBULE

Full Stack Developer | MERN Stack Developer | Software Developer

Pune, Maharashtra | +91 8149741148 | bhartiambule156@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer and MERN Stack Developer with hands-on experience building scalable, production-ready web applications using React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, and TypeScript. Proficient in real-time systems (Socket.IO, WebSockets), AI/ML API integration (Gemini API, Groq API, OpenAI), JWT authentication, role-based access control (RBAC), and CI/CD deployment on Vercel and Render. Delivered full-stack SaaS products and enterprise platforms serving 500+ active users with measurable improvements in API response time and database query performance.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design, Component-Driven Architecture

Backend: Node.js, Express.js, REST APIs, Socket.IO, WebSockets, MVC Architecture

Databases: MongoDB, PostgreSQL, MySQL, Supabase — Schema Design, Indexing, Query Optimization, Row-Level Security

Auth & AI: JWT, OAuth, RBAC, Supabase Auth, OpenAI API, Gemini API, Groq API (LLaMA 3.3), Prompt Engineering, Fallback Handling

Tools: Git, GitHub, Postman, Vercel, Render, MongoDB Atlas, CI/CD Pipelines, html2canvas, jsPDF, OOP, DSA

INTERNSHIP EXPERIENCE

MERN Stack & AI Developer Intern | Heal Bharat (CareerPlus) 2026

Full Stack Development | AI Integration | Performance Optimization | CI/CD

- Architected and deployed a production-grade full-stack Coaching Management System serving 500+ users using React.js, Node.js, Express.js, and MongoDB with CI/CD deployment on Vercel.
- Designed and optimized RESTful APIs with efficient middleware and MongoDB schema indexing, achieving measurable reductions in API response time and database query latency under concurrent load.
- Integrated AI/ML models for real-time emergency pressure prediction; implemented JWT authentication with RBAC across Admin, Teacher, Student, and Accountant roles with encrypted endpoint access.
- Wrote clean TypeScript across the full stack enforcing strict type safety, reducing runtime errors, and improving file download performance through backend-driven streaming optimization.

Frontend Developer Intern | CODETECH IT Solutions 2025

Frontend Development | React.js | TypeScript | REST API Integration

- Built responsive, accessible UI components using React.js, TypeScript, and Tailwind CSS following component-driven architecture and cross-browser compatibility best practices.
- Integrated RESTful APIs for dynamic real-time data rendering; collaborated on API contract design aligning frontend requirements with backend architecture for seamless end-to-end integration.
- Contributed to agile sprint cycles through code reviews, on-time feature delivery, and iterative UI/UX improvements while maintaining high code quality and performance standards.

PROJECTS

ResumeAI – AI-Powered Resume Generator (SaaS) [Live](#) | [GitHub](#)

Tech: Next.js, React.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Gemini API, html2canvas, jsPDF, Vercel

- Built a full-stack AI SaaS platform that generates ATS-optimized resumes using Gemini API with robust fallback handling, ensuring uninterrupted resume generation even during API failures.
- Implemented Supabase Auth for secure session management and PostgreSQL with row-level security (RLS) for resume storage, editing, and deletion with complete multi-tenant data isolation.
- Developed end-to-end PDF export using html2canvas + jsPDF; added premium feature gating with upgrade flow, generation limits, and Vercel CI/CD deployment with environment-based configuration.

Coaching Institute Management System [Live](#) | [GitHub](#)

Tech: React.js, TypeScript, Node.js, Express.js, MongoDB, JWT, Tailwind CSS, Vercel

- Developed a production-grade full-stack platform managing 500+ student records across attendance, fees, and academics with clean MVC architecture and optimized MongoDB schema indexing.
- Implemented multi-role JWT access control (Admin, Teacher, Student, Accountant) with encrypted endpoint protection and secure session handling across all user types.
- Deployed on Vercel with seamless CI/CD pipeline ensuring zero-downtime releases and consistent, reliable performance for 500+ active users under real-world concurrent load.

SalaryCoach – AI-Powered Salary Negotiation Platform [Live](#) | [GitHub](#)

Tech: React.js, Node.js, Express.js, MongoDB, Groq API (LLaMA 3.3 70B), Tailwind CSS, Vercel, Render

- Built a full-stack MERN application that generates personalized salary benchmarks and negotiation scripts using Groq's LLaMA 3.3 70B API with structured JSON-output prompt engineering.
- Designed a MongoDB-backed salary benchmarking engine using rolling-average aggregation across role, city, and experience range, dynamically improving market accuracy with every user search.
- Implemented a robust JSON-sanitization and multi-layer parsing pipeline to handle malformed LLM output, ensuring reliable API responses under real-world generation variance.
- Deployed a decoupled architecture with React frontend on Vercel and Express backend on Render, integrating rate-limiting, RESTful APIs, and CI/CD for zero-downtime updates.

ACHIEVEMENTS & CERTIFICATIONS

- 1st Place – Mindspark Project Expo | Selected – Smart India Hackathon 2025 (Internal Round) | Research Paper published at IEEE AIC 2025
- Certifications: MERN Stack Internship – Heal Bharat (2026) | AWS Solutions Architecture – Forage | Cybersecurity – Deloitte (Forage) | AI Agents – Google (Kaggle) | Kaggle - Hackathon Certification

EDUCATION

B.E. Computer Engineering 2023 – 2027

Ajeenkya DY Patil School of Engineering, Pune
